

# Licence to Fell Growing Trees

To:

This licence gives you permission under section 10 of the Forestry Act 1967 as amended to fell the trees described below and shown on the attached map.

Tree felling under this licence has been approved by the Forestry Commission as being in accordance with government policy for the sound management of a renewable resource.

**This licence expires on: 31 Mar 2019**

You should tell others involved with the felling about the details in this licence- e.g. by giving a copy of the licence and map to the person felling the trees. If you sell the land you should also tell the new owner about this licence. If a Tree Preservation Order is placed on these trees after this licence has been issued, you must also get the consent of the Local Authority before felling the trees.

**NOTE:** In England and Wales, a felling licence will not cover the felling of trees to which a Tree Preservation Order applies, or which are in a Conservation area, if you have not declared the existence of the Order or Area in the application.

Date: 01 Apr 2014

Signed for and behalf of the Forestry Commissioners.

## PART 1 - Description of the trees to be felled

Property: Frensham Vale Wood

Name of wood:

Local Authority: Waverley District

### General Notes:

Felling site, subcpt or coupe	Type of operation*	Species	Marking of trees	Area ha	Approx age of trees	Total number of trees	Estimated volume m <sup>3</sup>
1b	T	MB	Feller Select	10.60	50	2000	800

### \*Key

T =thinning; SF= selective felling; F =clear felling (to include group clear felling); FC =cutting coppice; FO =felling other; (e.g. hedge-row trees/single isolated trees)

---

## PART 2 - Restocking Conditions

No conditions

## PART 3- Notes

1b

Species breakdown  
70% sweet chestnut  
15%Oak  
15% Birch

All felling sites will be surveyed prior to felling. The survey will locate features that must be avoided so that they are preserved and are not disturbed during felling and extraction of the trees such as: archaeological features, badger setts, bird nests, and sites being used by European protected species.

Timber extraction routes and stacking areas will be pre-selected to minimise damage to the environment.

A selection of dead wood will be retained on site (both standing and lying).
